

BENTELER Automotive Policy

We, BENTELER Automotive, as original equipment manufacturer for the automotive industry, using hot and cold stamping, welding, casting, extrusion, forming, painting and assembly processes, declare:

We commit to comply with agreed customer and interested parties' requirements, meeting the technical, legal and other prescribed requirements concerning safety and health, environment, energy and quality.

We commit to maintain the process-oriented management system effective and to implement the Process Governance. This includes defining, maintaining and updating processes. Furthermore, we commit to improve the efficiency and effectiveness of our processes.

We commit to consider energy efficient performance as an integral part of our procurement process, to give priority to the protection of the environment and to prevent it from pollution.

We commit to provide safe and healthy working conditions by eliminating hazards and reducing health and safety risks in order to prevent work-related injuries and illnesses.

We commit to continuously improve our integrated management system, production processes, products and services and to use preventive methods in order to increase our performance. For us, it is a matter of course that we address risks and opportunities effectively to avoid negative impacts and to take advantage of chances.

We commit to satisfy our customers and interested parties completely.

We commit ourselves to motivate our employees, to provide the necessary information and resources and to utilize their potential in all activities, their collaboration and continuous improvement.

We commit to consult and participate workers and their representatives in the belongings of health and safety.

We commit to keep the company profitable.
